MARSHALL FIELD & COMPANY
CHICAGO

Make Every Dollar Count

Thrift can be practiced as well in the purchase of a diamond, a watch or a piece of silver as in the purchase of any other article.

The essential thing is to know that the money spent, whatever the amount, is spent to the best advantage—that part, or all, is not wasted on inferior quality which will not give satisfaction—and that for each dollar expended the maximum of value is received in return.

The following quotation from a statement by Mr. Thomas A. Edison, may be of general interest:

> "No legitimate industry is non-essential except as it interferes with the conduct of the war, and then only to the extent to which it interferes. No statistician can prepare figures that can be accepted safely as a guide to the curtailment that should occur in the manufacture of the so-called non-essentials.
>
> "We hear a good deal of talk about luxuries. Luxury is a relative term. What is luxury for one man is almost a necessity to another. No matter what is said or done, the increased earning power of the American people is going to result in the increased purchase of luxuries, and the urge to possess luxuries will do more to speed up production than all the prize contests, bonus plans, and proclamations that can be devised. The laziest and most non-productive man in the world is the man whose wants are the simplest. The fellow who has a family that wants luxuries and is endeavoring to gratify them is the man who is usually working the hardest and producing the most."

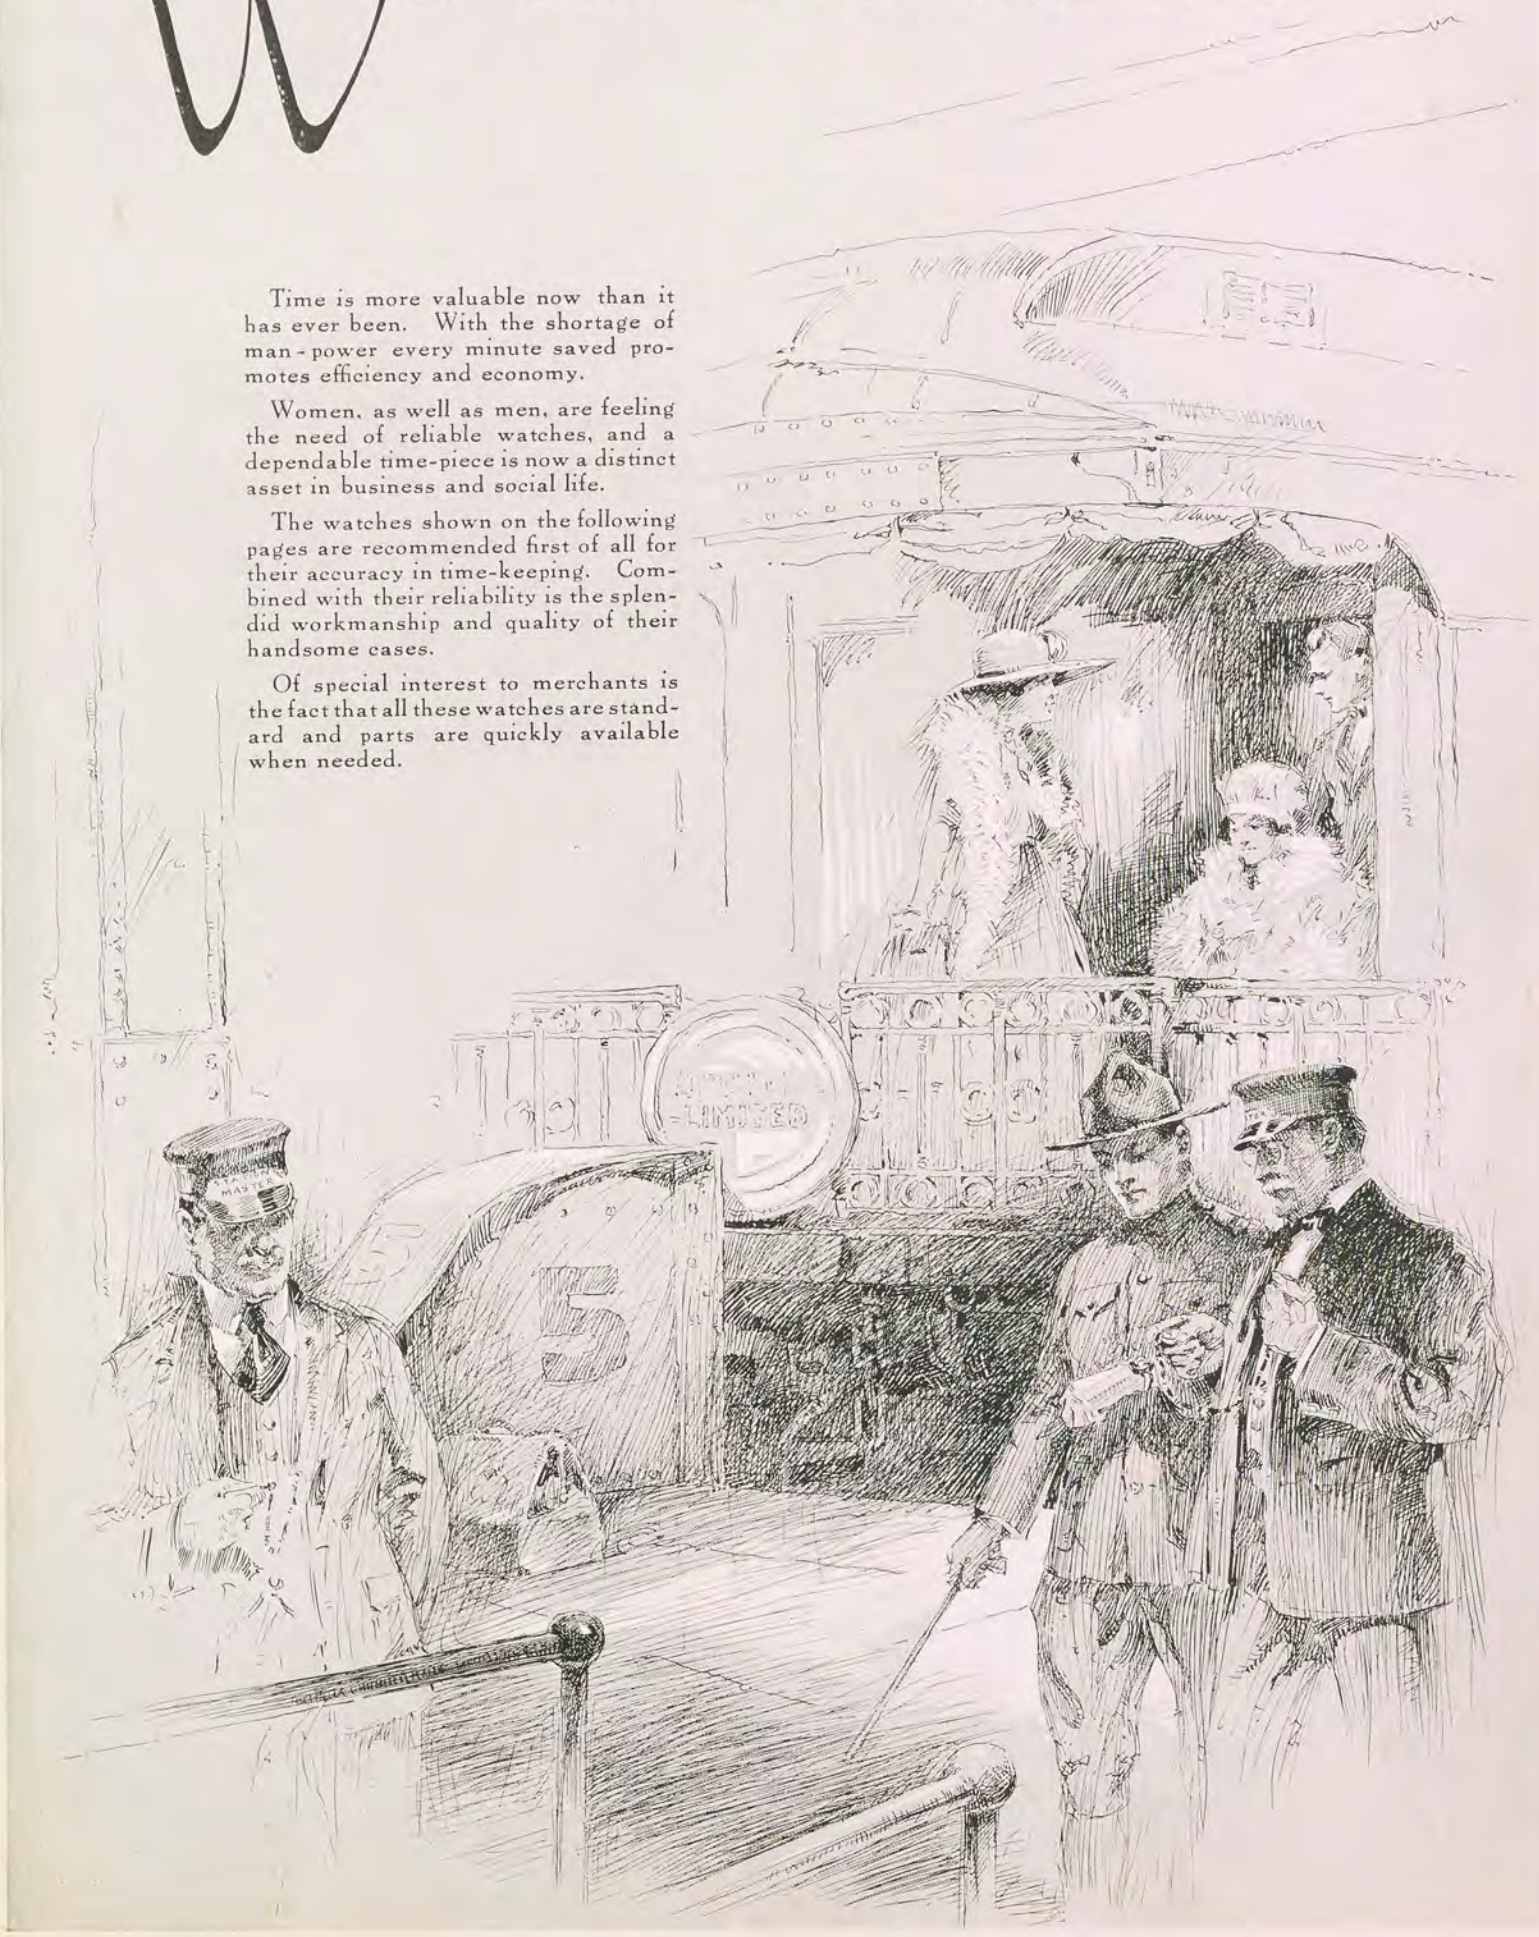

WATCHES

Time is more valuable now than it has ever been. With the shortage of man-power every minute saved promotes efficiency and economy.

Women, as well as men, are feeling the need of reliable watches, and a dependable time-piece is now a distinct asset in business and social life.

The watches shown on the following pages are recommended first of all for their accuracy in time-keeping. Combined with their reliability is the splendid workmanship and quality of their handsome cases.

Of special interest to merchants is the fact that all these watches are standard and parts are quickly available when needed.

Military and Sport Watches

How To Buy Diamonds

WHEN purchasing Diamonds, the following important points must be carefully considered.

CUTTING—See that the Diamond is properly cut, highly polished, brilliant and well proportioned. Diamonds cut either too thick or too shallow are not very brilliant—not so desirable as scientifically cut stones, and therefore not worth as much per carat.

COLOR—Diamonds are generally considered to be clear, transparent, colorless crystals, but comparatively few such stones are found. Many Diamonds are cloudy and opaque and a large proportion while clear, have yellow or brown tints and are much less desirable than "Pure White" stones. The finest commercial qualities are colorless. They are known to the trade as Pure White and Blue White, as the blueish tints become more pronounced the value rapidly increases. We carry only Pure White and Blue White Diamonds.

PERFECTION—Diamonds are generally found with innumerable degrees of imperfections, such as carbon spots, bubbles, clouds, feather-like markings, cracks, chips, etc. which in a great many instances detract from their brilliancy. We do not sell Diamonds in which imperfections are discernible with the naked eye or which detract from their brilliancy. We carry a complete stock of absolutely perfect Diamonds.

COMMERCIAL VALUE—Each Diamond, whether perfect or imperfect, large or small, has a certain commercial value which is gauged by the color, the cutting, the brilliancy and the degree of perfection. It is therefore necessary that purchases be made only from dealers who, through accurate knowledge of the business, large volumes of purchase and close relations with the chief supply sources are able to guarantee correct values.

OUR EXCEPTIONAL VALUES—Strict adherence to correct standards of cutting and maintenance of our superior qualities puts us in a position to offer exceptional values to Diamond buyers.

TOO SHALLOW

PERFECT PROPORTION

Scientific Cutting

TOO SHALLOW ABOVE GIRDLE

Copyright, 1914, Marshall Field & Company, Chicago

THE Diamond's chief value to the wearer lies in its brilliancy and it is therefore essential the purchaser make a comparison of stones rather than of weights and prices. It frequently occurs that of two stones, the one of lesser weight, perfectly cut, appears larger and more brilliant, and is consequently more desirable.

The accompanying illustrations will convey some idea of the advantages to be gained by scientific cutting. They show the direction light rays take as they are reflected back from the stone. It is this reflection of light that produces brilliancy in the Diamond, and it will be readily observed that the perfectly cut Diamond is the only one in which the reflection of light is complete and evenly distributed over the entire surface of the stone.

We classify our Diamonds according to fixed standards of quality. The painstaking care with which our selections are made assures uniform classification and correct values.

OUT OF BALANCE

TOO THICK ABOVE GIRDLE

Our Quality Standards :

PURE WHITE "A"—A beautiful clear Water White is the notable feature of this Grade. Each Stone is scientifically cut and proportioned which insures proper refraction of Light Rays and maximum brilliancy. They reveal a decided tinge of Blue for which reason they are readily sold as "Steel Blue."

PURE WHITE "B"—Diamonds of this Grade are of a fine Water White Color containing minor imperfections seldom discernible to the naked eye. They possess the same brilliancy as perfect Diamonds and when viewed from the surface reveal a fine bluish white tinge.

BLUE WHITE "A"—Diamonds of this Grade are cut from fine blue white stones known to the Trade as fine "Wesselton Diamonds." Being scientifically cut and proportioned they possess the greatest brilliancy possible in a Diamond. Our Blue White "A" Diamonds are all gem stones.

BLUE WHITE "B"—These Diamonds actually show a decided Blue Tinge which is greatly intensified under artificial light. The slight imperfections which they contain cannot be detected with the naked eye and owing to their being perfectly cut and proportioned possess the highest degree of brilliancy.

BLUE WHITE "C"—Diamonds of this Grade contain minor imperfections which can be detected only upon very close examination. These imperfections do not detract from their brilliancy as each stone is perfectly cut and well proportioned.

EXTRA BLUE WHITE—These are Diamonds of the finest quality and are obtainable from only a few sources. To the discriminating buyer this grade is most attractive as each stone is a real gem finished with the utmost care. The greatest brilliancy possible is obtained in this quality of Diamonds.

Diamonds and Diamond Set Jewelry will be submitted for approval subject to acceptance by the customer if retained longer than ten days.

Women's Diamond and Precious Stone Set Rings

Pure White and Blue White Diamonds

Exquiste taste dominates this collection of Fancy Rings. Before manufacture is begun on these mountings careful study is given to the setting of each gem that it may be displayed to the best advantage. The splendid results are evident in these superbly finished mountings. The diamonds are of the finest quality.

The comprehensive range of prices found on this page will meet the requirements of almost every purchaser.

Women's Diamond Set Rings

14K Solid Gold, Hand Wrought Mountings. The Field Solitaire

Of all jewelry the engagement ring carries the most beautiful sentiment and grows more precious as the years go by.

The Field Solitaire Ring is made with infinite care, is correct in height, perfect in proportion. These beautiful rings display the diamond to the best advantage.

Our Qualities

PURE WHITE "A"—These diamonds are of a clear Water White Color. Each stone is scientifically cut and proportioned which insures proper refraction of Light Rays and maximum brilliancy.

PURE WHITE "B"—Diamonds of this grade are of a fine Water White Color containing minor imperfections seldom discernible to the naked eye. They possess the same brilliancy as perfect diamonds and when viewed from the surface reveal a fine bluish white tinge.

BLUE WHITE "A"—Diamonds of this grade are cut from fine Blue White stones known to the trade as fine "Wesselton Diamonds." Being scientifically cut and proportioned they possess the greatest brilliancy possible in a diamond.

BLUE WHITE "B"—These Diamonds actually show a decided blue tinge which is greatly intensified under artificial light. The slight imperfections which they contain cannot be detected with the naked eye. They possess the highest degree of brilliancy.

BLUE WHITE "C" Diamonds of this grade contain minor imperfections which can be detected only upon very close examination. These imperfections do not detract from their brilliancy as each stone is perfectly cut and well proportioned.

EXTRA BLUE WHITE—These are diamonds of the finest quality and are obtainable from only a few sources. To the discriminating buyer this grade is most attractive as each stone is a real gem finished with the utmost care. The greatest brilliancy possible is obtained in this quality of diamonds.

Diamonds and Diamond Set Jewelry will be submitted on ten days' approval.

For the man's Diamond ring the "Gypsy" mounting is especially popular. It is distinctively masculine in character; has a wide range of designs giving individuality. In this form of setting, the diamond is shown to its full advantage and the girdle is protected.

These hand-wrought rings are of the newest designs, beautifully modeled and finished.

THE artistic merit, beautiful coloring and the character represented in each classic head gives an enduring interest to the Cameo. It is therefore most appropriate for a ring setting, as a ring is more constantly worn than any other article of jewelry.

The selection illustrated is interesting on account of the variety of Cameos, the distinctive styles of rings shown and the splendid values throughout the range of prices. Our Cameos are all carefully and individually selected.

THE FASHION FOR BROOCHES

The season's styles again place the brooch in vogue. It is a most practical piece of jewelry. The constantly changing styles do not displace its usefulness, but make it an article of practicability as well as of adornment.

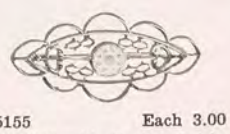

The selection shown here is very complete, covering a wide variety of designs, and a full range of prices. The same general effects are carried out in the cheaper pieces as are characteristic of the more expensive.

25126 **Each 2.50**
10k solid gold; green gold finish; engine turned.

DIAMOND Set Brooches are in favor. These beautiful jewels lay especial claim to popularity because of the many ways in which they can be worn.

The charming effects obtained by the delicate and intricate designs combine with the modern dress fabrics and colors.

Particular attention is called to the graceful lines and exquisite workmanship on each piece in this selection.

The Diamonds used are of the fine Pure White and Blue White qualities, each stone being perfectly cut and containing the greatest brilliancy possible.

Solid Gold Mounted, Cameo Brooches

Finely Carved Coral, Cornelian and Pink Shell Cameos

Cameos always are in fashion. This charming bit of art has maintained its general popularity since early Roman days. Each cameo has a certain individuality. They are hand-carved and consequently no two are exactly alike. It is this distinction that gives the cameo its charm.

Now that the antique is more than ever appreciated the cameo is receiving full recognition. Our collection is of superb completeness. The mountings are of the newest designs and of superior workmanship.

Customers desiring to have their own cameos remounted are invited to inspect the special designs and drawings we will be pleased to submit.

Extra Fine Quality Oriental Pearl Necklaces

THE FASHION OF CENTURIES

In all parts of the world and continuously for centuries the pearl has been supreme among jewels—always ultrafashionable. To-day more than ever before Fashion has popularized the pearl, that justly prized gem, of "purest ray serene."

The general depletion of the world-famous pearl fisheries of the Orient has caused a steady increase in the intrinsic value of these wonder jewels of the sea.

The necklaces illustrated are a few examples of the excellent values we offer from our complete stock. Each pearl in our entire collection of necklaces has been specially selected with a view of giving the highest quality at the most reasonable price. All of our necklaces, including the most inexpensive, are beautifully matched and of exquisite lustre.

A pearl's value is determined by its lustre, shape and uniformity of contour. These values are not to be excelled.

We can furnish necklaces at any price desired and will submit them on ten days' approval.

9791—Fine quality Oriental pearls, beautiful lustre, perfectly matched, round and graduated, 173 pearls 43.50 grains, hand wrought pierced platinum clasp, length 14½ inches ..... Each **170.00**

White Stone Set Jewelry

The artistic manner in which White Stone Jewelry is made by American manufacturers has won for it wide spread popularity and it is now accepted as the equivalent of fine diamond jewelry from an artistic standpoint. The articles presented on this and the following page are typical of the best work in this line and while possessing high artistic merit they are very reasonably priced. Merchants will find this line profitable in their stocks as White Stone Jewelry finds a ready sale and with a small investment and frequent turn-over a good volume of business may be developed.

1440/2 Each 5.00
1/10th gold filled; fancy bar and cable link; English finish; length 15 inches.

Strongly in favor and increasing in popularity is the Dickens Chain. It is worn across the vest, looped from the center with a locket or charm suspended from the center bar.

The Watch is carried in one pocket, and in the other, one or more convenient novelties such as a knife, cigar cutter, match case or other similar items as will be found on pages 76–77.

This line embraces the most practical and correct styles.

MILADY'S BOUDOIR

THE following pages will appeal to every woman because they reveal comforts and luxuries for the complete boudoir and the proper equipping of a home. Articles which women love as gifts and also articles which they particularly require for guest rooms, together with every toilet requisite are displayed.

Merchants will find these lines in brisk demand, and they can make them a valuable feature of merchandising service by using them to build a fully-stocked toilet accessories section.

Engraving Designs for Monograms, Letters, Etc.
on Grained French Ivory Toilet Articles

Black, Light Blue, Dark Blue, Medium Blue, Red, Brown, Green, Pink, Lavender and Gold, or Combinations of Colors.
Sizes indicate Height of Letter or Three Letter Monogram.
Monograms require from two to ten days for delivery, varying according to the season and amount of work. We positively cannot accept orders to be delivered within a specified time. Where size of monogram or letter is not specified, we will make it in proportion to size of article.

DISPLAY CASE FREE

With an order of two dozen pens in assorted numbers, as listed above, we will furnish gratis a handsome French plate glass case with plush trays to hold two dozen pens.

CROWN FOUNTAIN PENS, Etc.

Double Feeders. Every Pen Warranted. Illustrations Are Actual Size of Goods

These pens are not to be compared with the many cheap grades of pens on the market.
Crown pens have stood the test of time, there being a large number of pens in daily use which were purchased as long as fifteen years ago.
These pens are made for hard practical use, and are made of the best selected materials. The ink is supplied by two feeders, one above and the other below the gold pen, making the flow of ink regular. The top feed can be had in rubber or 14k gold; the under-feed is made of hard rubber. Gold pens are 14k, good weight, well made, and have hard iridium points. Holders are made of best Para rubber. In ordering state whether fine, medium or coarse point is wanted. Packed one in box.

Table Ware

Here you will find attractively illustrated a most pleasing display of things necessary to complete the equipment of the dining room.

Correct table ware adds much to the pleasure and comfort of the home and family.

At this time, more than ever before, thought should be given to the things which will promote the home spirit. Dainty and beautiful table wares are probably more appreciated by all the family than any other things in the home.

Attention is especially directed to the beautiful Wrought-Right Table Silver shown on pages 144 to 160. A feature of Wrought-Right Silver is the rare combination of beauty, real worth and moderate cost.

AMERICAN-SHEFFIELD SILVER PLATED WARE

The term American-Sheffield Plate as applied to these articles means that they are made of solid nickel silver, a fine quality of hard white metal which has been found to be superior to all others for taking and keeping a coating of silver and which because of the hardness and color insures the very best of ware. The old method, now obsolete, of making Sheffield plate was to take different basic metals and lay on both sides of this metal, a sheet of silver, roll into sheets and form, then engrave the different designs of the artist. The modern process of silver plating nickel silver gives the maximum of service possible in silver plated ware.

85766 **Each 27.75**
Alcohol Coffee Percolator; heavily silver plated on nickel silver; old English chased pattern; ebonized handles; capacity 6 cups; height over all 14 inches.

GLORIA TOASTER

H500 **Each 4.00**
Nickel Plated; a perfect Toaster of best material and workmanship; 110 volts only.

"UNIVERSAL" ELECTRIC TOASTERS

H944 **Each 9.88**
Nickel Plated.

H946 **Each 9.14**
Nickel Plated.

M. B. TOASTER

H636 **Each 10.26**
Nickel Plated.

HOT POINT TOASTER

H8 **Each 8.50**
Nickel Plated; toasts 2 slices of bread at a time; top shelf convenient for keeping plates or coffee warm. Has removable toast rack.

"UNIVERSAL" WAFFLE IRON

H930 **Each 21.60**
Full nickel finish with aluminum grids. Cooks from both sides at once. No smoke, no odor. 600 watts.

HOT POINT GRILLS

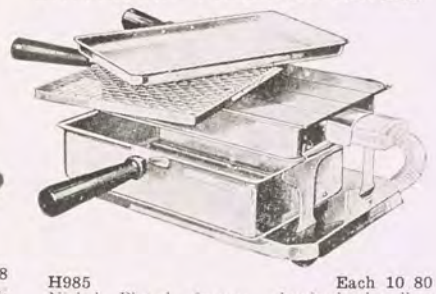

H9 **Each 9.80**
Nickel Plated; 600 watts; broils, boils, fries, toasts; made of steel and handsomely furnished with griddle, deep, medium dishes and tray for protecting table.

H981 **Each 10.08**
Nickel Plated; broils, fries, toasts and stews; size of grill, 4¾x8 inches; heating surface, 7⅝x4½ inches; depth, frying pan, 1¼ inches; boiling pan, 2 inches; griddle ¼ inch.

"UNIVERSAL" ELECTRIC GRILLS

H985 **Each 10.80**
Nickel Plated frame; ebonized handles; fibre feet; flat steel top; stove surface, 8⅞x5¼ inches; size of toaster, 9¼x5½ inches; depth of boiling pan, 2 inches; depth of griddle, ½ inch.

H984 **Each 13.68**
Nickel Plated; four heats; has two small interchangeable attachment plugs to easily regulate heat; height over all, 6½ inches; diameter of top, 8 inches; all pans have ebonized handles; packed complete, with 2-inch pan, 1¼-inch pan and combination griddle and reflector.

H32 **Each 11.90**
8-inch electric stove and grill combined; its double capacity makes two cooking operations possible at the same time from a lamp socket.

EGG COOKER AND WATER HEATER

H9932N **Each 13.68**
Nickel Plated; made of copper; ebonwood handle; heats a quart of water and has rack which holds six eggs.

IMMERSION HEATER

H11 **Each 7.00**
Nickel Plated; toilet size; 350 watts; quickly heats or boils any liquid; heating element guaranteed 2 years.

H12 **Each 9.80**
600 watts; crookneck shape is particularly designed for use in shallow vessels.

H970N **Each 7.58**
Nickel Plated; convenient for heating water, warming liquids, etc.; heats water in three minutes; a detachable swivel connecting plug prevents the cord from binding. Complete with 6-foot flexible cord and separable attachment plug.

"UNIVERSAL" PORTABLE RANGE

H9841 **Each 21.60**

ELECTRIC SHAVING MUG

H992N **Each 10.08**
Nickel Plated; made of copper; ebonwood handle; will boil one-half pint of water in a very few moments.

"UNIVERSAL" ELECTRIC DISC STOVES

6-inch polished iron disc.

H996 **Each 10.08**
Nickel Plated; one heat.

H997 **Each 11.52**
Nickel Plated; two heats.

WATER KETTLE

H975C **Each 17.28**
Copper; made of copper; ebonwood handles; capacity 2½ pints.

H975N **Each 17.28**
Nickel Plated.

H998 **Each 11.52**
Ebonized handles and base knobs; two heats.

H9960 **Each 10.08**
Ebonized handles and base knobs; single heat.

WATER HEATER

H991N **Each 9.83**
Nickel Plated; made copper; capacity 1½ pints.

HOT POINT RADIANT STOVE

H20 **Each 8.40**
600 watts; 7-inch glowing coil stove; 7¼-in diameter; 4 inches high; ull nickel finish; has 8-foot flexible cord, lamp socket attachment plug and interchangeable switch plug.

"UNIVERSAL" ELECTRIC RADIATOR

H9950 **Each 13.68**
Ebonized handle on top; sides nickel plated; reflector of highly polished copper; body black; height 14½ inches; width of body 10 inches; complete with 8-foot cord and 7-point contact.

HOT POINT HED-LITE HEATER

H34 **Each 12.60**
Reflector; triple copper plate; diameter 9½ inches; including guard 11 inches; back and base of steel; finished in black enamel. Parabolic Reflector adjustable; heat rays can be thrown in any direction; heating element durable and efficient. Base is counterbalanced so will always fall with heating element upward if tipped over, eliminating fire risk. Ebonized handle at back; interchangeable switch plug and 10 feet of cord, 650 watts; weight 3 pounds 14 ounces.

H225	25 lbs.	4 x12	1000-500-250	34.30

"UNIVERSAL" ELECTRIC IRON

H901N **Each 10.80**
Nickel plated; complete with reversible heat proof spring stand and indestructible push plug. Weight, 6 pounds.

HOT POINT BOUDOIR SET

H6 **Each 9.10**
Boudoir Set; consists of a 3-pound stand to convert the iron into a stove; hood to heat curling tongs or a marcel waver; pair of folding curling tongs; set fits compactly into the neat, brown felt bag furnished with the outfit; finish polished nickel.
H6½—Iron only **Each 7.00**

SEW E-Z-ELECTRIC SEWING MOTOR

JACK RABBIT TYPE

Each 23.00
Sew E-Z Jack Rabbit Motor, complete for sewing machine.
Fits any sewing machine, new or old. Attaches to any ordinary electric light socket. Will sew slowly as without the motor, or fast as desired, up to 800 stitches a minute. Speed is regulated by pressure of the foot.

EXTRA ATTACHMENTS FOR SEW E-Z MOTOR

Buffer and emery wheel combination **Set 1.90**
Fan Attachment **Each 3.50**
Cream Whip **Each 7.50**

THERMAX HEATING PAD

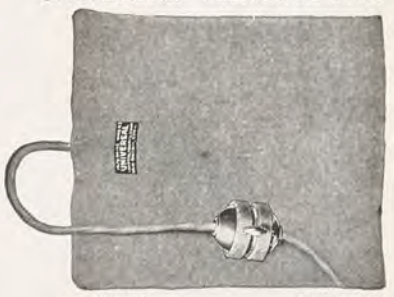

H1994 **Each 8.64**
11x8½ inches; equipped with 10-foot flexible cord; single heat range up to 185 degrees; has two automatic safety devices, which break circuit so pad cannot become overheated.

SAFETY COMFO

H9-3 **Each 8.50**
Safety Comfo, 40 watts; for all dry or wet applications of heat to the body; concave on one side and convex on the other; any temperature between 100 and 200 degrees Fahrenheit is obtained by adjusting the small lever in the neck. Has cord, attachment plug and a separable plug in the cord, three feet from the appliance; heating element guaranteed for one year.

"UNIVERSAL" HEATING PAD

H9940 **Each 12.96**
Equipped with 10-foot flexible cord; regulator giving three different heats and automatic safety device which prevents the pad from becoming over-heated; size of pad, 16x10 inches; each pad in white cloth bag and all in cardboard box.

"UNIVERSAL" ELECTRIC CURLING IRON AND HAIR DRYER

H9901 **Each 8.30**
Curling Iron; diameter of iron 5/16 inch.
H99011 **Each 9.14**
With hair dryer; diameter of iron 5/16 inch.
H9902 **Each 8.30**
Curling Iron; diameter of iron 7/16 inch.
H99021 **Each 9.14**
With hair dryer; diameter of iron 7/16 inch.

The handle is mahoganized with natural wood finish. Heavily nickel plated iron. Complete with 6-foot flexible cord and wire stand. Even temperature maintained. A detachable swivel connecting plug prevents the cord from binding. Aluminum comb for drying hair.

DOMESTIC CURLING IRON

Each 3.00
All metal parts nickel plated and highly polished; handles are polished, ebony finished. Complete with six feet silk cord and attachment plug.

CYCLONE ELECTRIC HAIR DRYER

H2 **Each 26.00**
Hair Dryer. Furnishes hot and cold air blast and will dry the heaviest head of hair in a few moments. The change from hot to cold is so gradual that it is almost imperceptible. Motor operates either direct or alternating currents of from 105 to 120 volts, 60 cycles. Special windings at a slight advance n price.

NEW LIFE VIBRATORS

These vibrators will give the utmost in service and satisfaction. Mechanically and Electrically Perfect. Have Universal Motors which will operate on either direct or alternating current 110 to 120 volts, 25 to 60 cycles and will operate from any light socket. A handsome 302 page volume treating exhaustively on the subject of vibratory massage furnished with each vibrator.

Type D **Each 21.50**
A light, efficient low priced instrument for family use; one speed; push button switch in handle to start or stop. Outfit includes six applicators, cord with attachment plug, and handsome carrying case.

Type F **Each 26.00**
Same construction as Type D, but has speed controlling device which permits light or deep vibration. Carrying case of black leatherette, lined with red satin.

Type A **Each 26.00**
A handsome, very compact and strong instrument for home use. Has speed regulating device, six applicators, cord and attachment plug. Highest quality throughout.

Type C **Each 34.00**
A professional type vibrator such as is used by physicians, masseurs, etc. Has powerful motor and heavier construction. Vibrations are deep and penetrating. Has speed regulating device. Six applicators. Black leatherette carrying case, satin lined.

Y5219 **Each 17.50**
Pottery Green; narrow decoration; quart carafe with metal and cork stopper.

THE Thermos Carafe has developed such a wide popularity and has been found so convenient—yes, even necessary—in the well appointed home, that a demand has arisen for these Carafes and Jugs in art color finishes to match the furnishings of the room. There have been many attempts to color metal, but none of these have been found entirely satisfactory until the discovery of the process used exclusively in finishing the Thermos line.

The art of enameling and decorating Thermos products illustrated herein was created by Marshall Field & Company Chicago By special arrangement reproduced by the American Thermos Bottle Company

Y55200—Verde Green	Each 12.95

Handy Reference

Gems and Semi-Precious Stones

Abalone Pearl—See pearl.

Agate—Semi-translucent stone, variegated, colors in clouds, spots or bands—bands in parallel, straight or circular form.

Agate, Moss—Agate in which the ores of iron tend to branch giving a moss appearance.

Alexandrite—A leaf green transparent stone—purple by artificial light, rare and valuable.

Almandine—Violet or Columbine red garnet.

Amazon Stone—Light green opaque stone, sometimes mistaken for Chinese jade.

Amber—Fossil gum of trees varying in color from clear golden yellow to white clouded opaque. May be artificially colored any hue.

Amethyst—Rich purple transparent variety of quartz.

Aquamarine—A pale sea green or blue green transparent stone. Composition same as emerald.

Aventurine—Green or reddish brown semi-translucent stone with a flaky appearance.

Bloodstone—Dark green jasper, spotted with red jasper.

Calcutta Quartz—Name given to brilliant red opaque glass used for beads, hat pin heads, etc.

Carbuncle—Deep red garnet cut dome shape with facets.

Cat's Eye—Semi-translucent olive green stone, displaying a light sheen across its polished surface (resembling a cat's eye) which appears to move as the stone is turned in different positions.

Chalcedony—Agate of one concrete color.

Chrysoprase—Apple green, translucent stone, species of Chalcedony.

Coral—Organic substance, axial skeleton of sea living animal; colors white, rose to dark red. Delicate shell pink most expensive.

Diamond—Write for our diamond booklet.

Cut Diamond—Usually denotes a diamond cut in the brilliant form round with facets on top and back, the best method of cutting the diamond, as it reveals its fire and brilliancy.

Our Qualities—

Standard White, having slight yellowish tinge when unmounted. These stones when viewed from the surface are white and very brilliant.

Pure White, clear white, very brilliant.

Blue White, pure water white with steel blue tinge.

Extra Blue, finest color obtainable, perfect in every respect.

Diamond, Rose—Diamond with flat back-facets on top. Diamond chips are often referred to as rose diamonds.

Emerald—Deep rich green transparent gem, usually flawed, but when flawless equals finest quality diamonds in value.

Garnet—Dark red transparent stone, shade darker than ruby.

Garnet, Bohemian—Deep red garnet, found and cut in Bohemia.

Gold Stone—Reddish brown opaque glass with flaky golden spots, imitation of Aventurine.

Hematite—Oxide of iron, with black metallic lustre, takes very high adamantine polish.

Jade—Dark green opaque stone, scientifically known as Nephrite.

Jade, Chinese—Semi-transparent white to grass green color, tough, flinty texture, very hard.

Jasper—Opaque Chalcedony, colors red, brown or green, often found banded and spotted.

Jet—Black, opaque, extremely light species of coal. Capable of taking on high polish. Finest jet obtained in Whitby, England.

Jet, French—Lustrous black glass, cut to imitate real jet.

Jet, Italian—Highly polished black Galalith, used extensively for bead necklaces.

Lapis Lazuli—Rich blue opaque stone, some varieties marked with small spots or veins.

Lapis, Swiss—Stone artifically colored to imitate real Lapis Lazuli.

Malachite—Bright green opaque stone, with black markings or grainings.

Moonstone—Pearly white translucent stone, transparent in some positions—good quality has silvery blue sheen.

Olivine—Very brilliant green, transparent stone. Composition same as garnet.

Onyx—Chalcedony in one color of white, gray and black.

Opal—Greenish, bluish or milky white opaque stone with flaky spots of red, orange and purple.

Opal, Black—Opals whose predominant color is smoky blue.

Opal, Fire—Opals whose predominant colors are bright red and yellow.

Opal, Matrix—Opal with streaks of iron stain or veins of crude stone.

Opal, Onyx—Genuine opal overlay over black onyx. Resembles black opal in appearance.

Pearl, Gem—Organic substance secreted in shells of oysters, value depending principally upon lustre or sheen, usually cream white or pink, but all colors and shades occur.

Pearl, Abalone—Iridescent, vari-colored and blistered Mother-O-Pearl to Abalone Oyster.

Pearl, Baroque—Natural pearls of irregular shapes.

Pearl, French—Imitation gem pearls.

Pearl, Fresh Water—Pearls from shells of fresh water clams, usually inferior to oriental pearls. Also applied to pearl cut from fresh water clam shells, as in case of buttons, etc.

Pearl, Half—Small pearls with flat backs.

Pearl, Indestructible—Solid glass or stone beads coated with material giving a pearly lustre.

Pearl, Japanese or Cultured—Natural pearl produced by placing small pearl or hard substance in oyster over which natural pearl deposit is formed.

Pearl, Mother of—Opalescent pearly lining of oyster shells—also termed ocean pearl.

Pearl, Oriental—Gem pearls from salt water oysters. Usually of finest quality.

Pearl, Seed—Small real pearls.

Pearl, Wax—Glass beads filled with wax to imitate pearls.

Peridot—A rich olive or bottle green transparent stone.

Rock Crystal—A colorless variety of transparent quartz.

Rock Crystal Glass—A term applied to fine crystal glass cut with floral or scroll designs similar to cuttings on genuine rock crystal urns, vases, etc.

Rose Diamond—See diamond.

Rose Quartz—Light rose colored quartz, hazy in texture—not transparent.

Ruby—Brilliant red transparent gem. Pigeon's blood color most valuable. Next to the diamond in hardness.

Sapphire—Rich blue transparent gem—composition same as ruby.

Sapphire, Colored—Transparent stones in colors of white, purple, green, yellow, etc. Composition same as ruby. Sometimes termed Oriental Amethyst, Topaz, Emerald, etc.

Sapphire, Montana—Genuine sapphires found in State of Montana, inferior to Oriental stones.

Sardonyx—Onyx of brownish red color.

Spinel—Vari-colored mineral resembling sapphire, rose tinted "Balas Ruby" most common.

Star Ruby and Star Sapphire—Stones having peculiar natural formation displaying six narrow lines of light, radiating from center, suggestive of stars.

Tiger's Eye—Golden brown semi-translucent stone, having same chatoyant qualities of Cat's Eye.

Topaz—Golden yellow or brown transparent stone.

Tourmaline—Transparent stone found in various colors—rose and green most common.

Turquoise—Soft, opaque delicate sky blue stone.

Turquoise, Guaranteed—One that has been treated to prevent change of color which frequently occurs in Turquoise.

Turquoise Matrix—Turquoise, showing brown limestone markings often having an imperfect appearance.

MANUFACTURED GEMS

Doublet—Name given to imitation rubies, sapphires, and emeralds, made of colored glass, with a thin layer of sapphire, ruby or emerald cemented to the top to give a hard surface.

Reconstructed—Term applied to stones formed by fusion of chips from cutting of gems.

Synthetic—Gems produced by fusion of component parts of respective minerals by aid of blow. pipe producing a real stone.

FINISHES

Antique Brass—Dull finish, oxidized to imitate old brass.

Antique Gold—Dull finish with dark brownish cast to imitate old gold.

Burnished—Highly polished.

Butler—Dull or brushed silver finish.

Bright Cut—Cut or engraved showing natural color of metal through outer finish.

Brushed Brass—Dull finished brass.

Colonial Brass—Similar to brushed brass with slight oxidizing.

Engine Turning—Machine engraved lines such as seen on backs of watches, cuff links, pins, etc.

English—Bright yellow gold.

French Gray—Silver with soft gray finish.

French Bronze—Fine imitation real bronze.

Gray—Silver Gray.

Green Gold—Gold finished with greenish cast, various tones.

Iridescent—Crystal, reflecting rainbow colors.

Matt—Dull finish.

Mosaic—Small pieces of various colors inlaid, forming designs.

Old English Brass—Brass with dull golden finish.

Old Gold—Dull golden finish with brownish cast.

Old Silver—Dull silver finish with gray or black oxidizing.

Handy Reference
Metals and Finishes

FINISHES—Continued

Oxidized—Metal darkened to bring out detail of design.
Polished—Highly burnished or polished showing natural color of metal or plating.
Pompeiian—Greenish finish similar to color of brass or copper discolored by verdigris.
Roman—Dull yellow gold.
Rose Gold—Dull yellow gold with light brown finish used to bring out detail of design.
Rose and Green—Combination of rose and green gold used to effectively bring out a design.
Satin—Soft or sanded finish applied to silver and gold.
Silver Ivory—An ivory finish produced with silver, harmonizing with Parisian ivory.
Verde—Same as Pompeiian.

CUTTING

Brilliant—Round, with facets on top and back.
Cabochon—Polished convex without facets. Opals, moonstones, turquoise, etc., are usually cut in this manner.
Cameo—Engraving standing out boldly in relief upon stone, shell, coral or mineral. Two color effect for subject and back ground is obtained on striped agate or conch shell by using the band of lighter color for the subject, cutting through to the darker color for the back ground.
Intaglio—Engraving cut into a substance, forming a hollow.
Scarab—Stone cut in form of beetle, or imitation stone molded in same form worn as amulet by Egyptians.

MATERIALS

Calabash—A very hard, specially cultivated species of gourd used extensively for pipe bowls, utensils, etc.
French Grained Ivory—Celluloid imitation of elephant ivory showing natural graining; also termed "Parisian Ivory."
Galalith—Composition similar to celluloid in appearance, capable of taking on high polish, susceptible to any dye. Fine imitation for coral, lapis and jet, used extensively for beads.
Meerschaum—A soft, extremely light pure white mineral, used chiefly for pipe bowls.

METALS

Brass—Yellow alloy of copper and zinc.
Bronze—Brownish alloy of copper and tin.
German Silver—Hard metal, nickel silver, new silver, white copper, etc. are names applied to alloy of copper, zinc, nickel, iron and tin, commonly termed German silver. It is extremely hard, withstands oxidation—and is the finest metal for silver plated wares.
Gold—Very malleable and ductile mineral always alloyed with silver and copper in varying proportions of 22 to 2, 18 to 6, 14 to 10, and termed 22, 18 or 14 karat fine.
Gun Metal—Steel, oxidized black, and specially treated to remove all rust.
Hard Metal—German silver or nickel silver.
Platinine—Imitation platinum.
Platinum—Finest of Jewelers' metals, always alloyed with irridium, has a silvery appearance.
Silver—Soft mineral always alloyed with copper.
Sterling Silver—Sterling Silver is 925 parts pure silver; 75 parts alloy.
Solid Gold—When quality of gold is not mentioned, it is usually below 10kt. or because the construction of the article requires soft solder or stiffening with other metal, the quality of gold cannot be indicated.
10K Gold—10 parts pure gold, 14 parts alloy.
14K Gold—14 parts pure gold, 10 parts alloy.
18K Gold—18 parts pure gold, 6 parts alloy.

PLATING

Electro Plate—Gold deposited upon base metal—usually brass, by electric current in solution, various qualities depending upon length of time article is submitted to electrolysis.
Gold Plate—Same as electro-plate.
Gold Filled—Term given to very heavy electro-plate and rolled plate.
Rolled Plate—Plating by attaching bar of gold to bar of base metal, heating and rolling to desired thickness.
1-10 Gold Filled—1-10 of weight of metal is gold.
1-4 Gold Filled—¼ of weight of metal is gold.
Silber Plate—Deposit of fine silver on base metal by electric current in solution. The terms triple, quadruple, etc., are used by manufacturers to indicate extra qualities of plating.
Sheffield Plate—Modern imitations of old Sheffield are usually electro-plated with silver on copper or hard metal. Old Sheffield Plate was made by applying sheets of silver to a base of copper, but the method is now obsolete.

BIRTHSTONES AND THEIR SIGNIFICANCE

D—17½x21 inches square	Dozen 11.00
E—21x20 inches square	Dozen 12.00

JEWELRY CLEANER BOX

19849 ..... **Per Set 2.20**
Chamois Skin, Soap and Jewelers' Sawdust in wood box.

CARE OF JEWELRY AND SILVERWARE

CARE of one's jewels is most important, deserving of careful consideration. Jewels should always be kept in a highly lustrous state.

They may often be cleaned in the home with the aid of luke warm water, jewelers' soap and a small brush. Diamonds, emeralds, rubies, sapphires, garnets, peridots, amethysts, tourmalines, topaz and similar stones may be cleaned in this way.

Care should be taken in using a brush on set stones so as not to loosen the prongs. Tissue paper is liable to loosen settings in drying jewels and should not be used. Jewelers' sawdust such as illustrated with the cleaning outfit at bottom of page is the safest and best way to dry jewels.

Cut 19849 illustrates the style of cleaning outfit best adapted for home use in cleaning jewelry and silverware. It contains all necessary requisites for cleaning, drying and polishing.

Silverware and all silver plated articles tarnish easily. In cases of slight tarnishing a cloth may be used.

Silverware when not in use should be kept in flannel rolls such as those illustrated here. If kept in a drawer, a small piece of camphor placed in the drawer will greatly aid in preventing tarnishing.

GRAY FLANNEL ROLLS
For Silverware

19824—For 6 Teaspoons	Dozen 6.30
19825—For 12 Teaspoons	Dozen 8.60

GOOD MERCHANDISE IS GOOD-WILL INSURANCE

MERCHANDISE that satisfies the consumer is the best good-will insurance you can carry.

It is the only kind of merchandise you can afford to sell. No matter how low your price is, the consumer expects the articles bought of you to give satisfaction.

A low price does not atone for the disappointment the consumer experiences in getting a poor piece of merchandise.

The reputation of your store is determined by the kind of merchandise you sell. You cannot afford to sacrifice quality in order to make low prices.

We render you a great service because we offer you good merchandise that you can sell at satisfactory prices, and refuse to skimp quality in order to make lower prices. We afford you the protection of knowing that when you sell our merchandise it will make satisfied customers for you.

Sell our merchandise and you will not only make profits now, but you will be building prestige for your store for the future.

MARSHALL FIELD & COMPANY

FIELD QUALITY

The production of merchandise which does not measure up to reliable, serviceable and satisfactory standards is an inexcusable waste, particularly in these times when every dollar spent must bring full value in return.

This is and has always been the guiding thought in the manufacture and selection of our lines.

FIELD QUALITY has greater significance in the commercial world today than ever before, because it stands for reliable and satisfactory merchandise and a never varying standard, which makes for true economy and thrift.

No greater economic service can be rendered to the consumer by producers and merchants than to strictly adhere to this principle in all merchandising.
